

Colloquium of the Collaborative Research Centre 973

Joint CRC & DCPS Colloquium

summer term 2014

Location: Kleiner Hörsaal der Pflanzenphysiologie; Königin-Luise-Straße 12-16; 14195 Berlin

09.05.2014, Friday

12:00

Silke Ruppel

Leibniz-Institut für Gemüse- und Zierpflanzenbau, Großbeeren

Crosstalk between plant and its microbiome

06.06.2014, Friday

12:00

Roxina Soler

Netherlands Institute of Ecology, Wageningen, NL

Plant-mediated interactions between insects within and across domains: From insect ecology to plant defence signalling

13:00

Christine Faulkner

John Innes Centre Norwich, UK

Manning the gates: Receptor-mediated control of cell-to-cell communication during plant defence

13.06.2014, Friday

12:00

Gertien J. Smits

University of Amsterdam, NL

protON/OFF: Intracellular pH as a second messenger controlling growth rate and stress adaptation

04.07.2014, Friday

12:00

Simon Barak

Ben-Gurion University of the Negev, Israel

Discovering new plant stress tolerance determinants – From systems biology to reductionism

13:00

Philip Mullineaux

University of Essex, UK

Signalling from reaction centre to gene in high light exposed leaves: Is this necessary to prime leaves for acclimation?
