

Colloquium of the Collaborative Research Centre 973

Joint CRC & DCPS Colloquium

winter term 2013/2014

Location: Kleiner Hörsaal der Pflanzenphysiologie; Königin-Luise-Straße 12-16; 14195 Berlin

25.10.2013, Friday

12:00

Claus Schwechheimer

Technische Universität München

PIN-ning down the function of D6PK protein kinases in *Arabidopsis*

01.11.2013, Friday

12:00

Barbara Halkier

University of Copenhagen

Plant transport engineering - Exploitation of transport processes to remove anti-nutritional compounds

13:00

Oliver Bossdorf

University of Tübingen

Epigenetic variation and stress responses of plants

10.01.2013, Friday

12:00

Uwe Sonnewald

Friedrich-Alexander-Universität Erlangen-Nürnberg

Plant responses to simultaneous stress applications - how *Arabidopsis* copes with heat, drought and viral infections

13:00

Roxina Soler

Wageningen University

Plant-mediated interactions between insects within and across domains: from insect ecology to plant defense signaling

17.01.2014, Friday

12:00

Ulrich Lüttge

TU Darmstadt

Integration of modules for the emergence of plants as self-organized individual organisms: Information – signals – memory

07.02.2013, Friday

12:00

Bettina Hause

Leibniz Institute of Plant Biochemistry

Jasmonates from top to bottom: functions in development and biotic interactions of plants

13:00

Uwe Conrath

RWTH Aachen University

Plant defense priming
