

Colloquium of the Collaborative Research Centre 973

Joint CRC & DCPS Colloquium

summer term 2018

Location: Kleiner Hörsaal der Pflanzenphysiologie; Königin-Luise-Straße 12-16; 14195 Berlin

20.04.2018, Friday

Asa Strand

Umeå Plant Science Centre, Umeå University, Sweden

The role of retrograde signals during plant stress responses

Different location: Universität Potsdam, Campus Golm, Haus 29, Seminarraum, Karl-Liebknecht-Straße 24-25
14476 Potsdam OT Golm

04.05.2018, Friday

Aleksandra Skiryicz

Max Planck Institute of Molecular Plant Physiology

From small molecules to proteins and back; what can we learn from the small molecule-protein interactome

08.06.2018, Friday

Claude Becker

Gregor Mendel Institute of Molecular Plant Biology, Vienna, Austria

Reconfiguring the epigenome by bypassing epigenetic resetting in the germ line

15.06.2018, Friday

Veronica Maurino

Heinrich-Heine-Universität Düsseldorf

How plant cells cope with reactive carbonyl species

22.06.2018, Friday

Yee-yung Charng

Academia Sinica, Taipei, Taiwan

Molecular mechanisms underlying thermotolerance diversity in plants

13.07.2018, Friday

Christiane Wolz

Eberhard Karls Universität Tübingen

The stringent response in *Staphylococcus aureus*
